1/ Federal participation in vendor payments for medical care under programs except general assistance, which is financed entirely from State and local funds, was made possible beginning October 1, 1950, by the Social Security Amendments of 1950. Since then there have been a number of changes in the method used to compute the Federal share of assistance. A 1957 change tended to depress the amount of vendor medical payments in 1957 and 1958.

2/ Averages based on cases receiving money payments, vendor payments for medical care, or both. Averages for general assistance not computed because of difference among States in policy or practice regarding use of general assistance funds to pay medical bills for recipients of the federally-aided categories.

3/ Includes amounts used to pay medical bills for recipients of the federally-aided categories.
